1. Introduction

This document enables the certification of candidates in the English language based on the English star profiles. The assessment requirements are based on the Dutch standards for operational management of electrical installations, namely NEN 3140 (low voltage) and NEN 3840 (high voltage). Both Dutch standards are an elaboration of the European standard EN 50110-1 and are listed as such in EN 50110-2.

2. Allowed profiles

The certification is possible for the following profiles:

- 21101 –VP* (NEN 3140)
- 21201 –VP** (NEN 3140)
- 21202 –IVWV** (NEN 3140)
- 21301 –VP*** (NEN 3140 and NEN 3840)
- 21302 –IVWV*** (NEN 3140 and NEN 3840)
- 21401 –VP**** (NEN 3140 and NEN 3840)
- 21402 –IVWV**** (NEN 3140 and NEN 3840)

3. Assessment requirements

The assessment and certification of the above-mentioned English Star Profiles are based on the Dutch framework document STIPEL 20001:2026B.

A high-quality English translation of the Dutch framework document has been developed by the Technical Committee and the Expert Committee for Electrical Engineering.

This draft has been assessed by the committees as an adequate translation of the original Dutch framework document and has been published on our website as STIPEL 21001:2026B. Click on [this link](#) for further information on this document. Further refinement and development of the translation are ongoing.

Certificate holders who are in possession of a certificate based on an old profile, that has been issued less than five years ago have access to recertification for the new profiles without an entrance exam in accordance with the entry matrix as shown on page 4.
